Roman Metlinskyi

Senior Software Engineer

 Brno, Czech Republic   send_your_offers_here@metlinskyi.com

Hello, World! I am a full-stack software engineer specializing in ASP.NET.

I have broad experience across multiple technologies, including .NET Framework, .NET Core, SQL/NoSQL, JS/TS, HTML/CSS, and Docker. My primary programming language is C#, and I also enjoy working with Python and C++.

I have strong front-end skills with JavaScript and TypeScript, and hands-on experience with frameworks such as Angular and React. I leverage modern AI tools like GitHub Copilot to accelerate routine tasks and focus on designing optimal solutions.

Recent Experience (5)

Senior Csharp Developer, AVP at Barclays

Feb 2021 - Apr 2024, 3 yrs 3 mos

Prague, Czech Republic

Contributed to three Barclays projects: Developed an Excel Add-In (C#/VBA) and WPF app (C#) for marketing data visualization. Built a C#, TypeScript, Angular web tool for data management, snapshotting, rollback, and recovery.

Senior Analyst Developer at FNZ Group

Nov 2019 - Jan 2021, 1 yr 3 mos
Brno, Czech Republic

As an Analyst Developer, I led system analysis, database design (MS SQL), and the development of complex financial business logic, delivering modern web applications using C#/VB, ASP.NET MVC, and React. I partnered closely with QA analysts and cross-functional teams to produce world-class software solutions.

Team Lead at SoftServe

May 2019 - Dec 2019, 8 mos
Kyiv, Ukraine

Built a completely new development team to improve the performance of the e-commerce ASP.NET Web Forms application for Henry Schein, the largest medical supplier in the United States. Led the development process using an incentive-driven management approach. During this short period, the team significantly improved UI performance and resolved critical security issues. The initiative was successful; however, collaboration with Henry Schein was paused due to the COVID-19 pandemic.

Senior Software Engineer at Moneyveo

Jan 2018 - Apr 2019, 1 yr 4 mos
Kyiv, Ukraine

Addressed diverse technical challenges, including implementing new features, refactoring legacy code, and processing high-volume data in high-load systems. Applied SOLID principles, unit testing (NUnit), and IoC containers to build flexible, maintainable solutions. Worked with C# (C# 7), ASP.NET MVC, Web API 2, Autofac, NHibernate, RabbitMQ, SQL Server 2014/2017, Docker, Mercurial, and Jira.

Senior Software Engineer at PreciseQ

Jan 2016 - Dec 2017, 2 yrs
Kyiv, Ukraine

Developed and maintained two U.S. real estate–focused applications. Resolved issues for new releases and provided ongoing support for existing systems. Utilized C#, VB.NET, ASP.NET MVC, Entity Framework, T-SQL, WCF, Windows Services, Angular, and MSTest.
