Roman Metlinskyi

Senior Software Engineer

Brno, Czech Republic   ✉ send_your_offers_here@metlinskyi.com

---

Hello, World! I am a software engineer.

I graduated from Dnipro University of Technology (NTU DP) with a Bachelor's degree in Computer Science in 2004. I began a Master's program but left midway after receiving a job offer, as gaining real-world experience became my priority.

I started my career at a small company as a C++ programmer. Due to strong demand for web developers, I expanded my skill set into web technologies and have since grown into a successful ASP.NET full-stack software engineer.

I have wide experience with a variety of technologies and stacks, including ASP.NET, ASP.NET Core, SQL, JavaScript, HTML/CSS, and Docker. My primary programming languages are C# and TypeScript, and I also enjoy working with Python and C++.

I have over 20 years of experience working as a software engineer with ASP.NET technologies. I have strong front-end skills, including JavaScript and TypeScript, and hands-on experience with frameworks such as Angular and React. The HTML and CSS I write follow W3C standards.

I use modern AI tools like GitHub Copilot in my daily work, which helps speed up routine tasks and gives me more time to focus on finding the best solutions.

My specialties is Asp.Net full-stack software engineer.

Experience

Barclays

Senior Csharp Developer, AVP

Feb 2021 - Apr 2024, 3 yrs 3 mos
Prague, Czech Republic

During my time at Barclays, I contributed to three projects. Two focused on marketing data processing: the first was an Excel Add-In (C#, VBA), and the second a WPF application (C#), both emphasizing data visualization. The third project was an internal web tool (C#, TypeScript, Angular) for managing, snapshotting, rolling back, and recovering data.

FNZ Group

Senior Analyst Developer

Nov 2019 - Jan 2021, 1 yr 3 mos
Brno, Czech Republic

Analyst developers at FNZ are all-rounders who analyse required system changes, design databases (MSSQL), write complex financial business logic and create slick web applications (C#/VB, Asp.Net MVC, React). They also work closely with analyst testers and other members of the project team to produce world class software. Analyst developers will be expected to learn all about our application, the business and the industry we operate in.

SoftServe

Team Lead

May 2019 - Dec 2019, 8 mos
Kyiv, Ukraine

Built a completely new development team to improve the performance of the e-commerce ASP.NET Web Forms application for Henry Schein, the largest medical supplier in the United States. Led the development process using an incentive-driven management approach. During this short period, the team significantly improved UI performance and resolved critical security issues. The initiative was successful; however, collaboration with Henry Schein was paused due to the COVID-19 pandemic.

Moneyveo

Senior Software Engineer

Jan 2018 - Apr 2019, 1 yr 4 mos
Kyiv, Ukraine

My position was a senior .NET engineer. My responsibilities were solving different challenges tasks, such as improving new business features, refactoring and support legacy code, collect big data under a high-load system. SOLID and Unit Tests covering (NUnit) are helping me to solve everyday challenges. IoC container allows me to make solutions more flexible. A code review process is giving me an information regarding improvements in my decision. Daily meetings and retrospectives allowing to keep in touch with a team. In a development process, I use a scope of technologies: C-Sharp (C# 7), ASP.NET MVC and Web API 2 frameworks, Autofac, NHibernate ORM, message broker RabbitMQ, SQL server 2014/17, Docker, Mercurial, Jira.

PreciseQ

Senior Software Engineer

Jan 2016 - Dec 2017, 2 yrs
Kyiv, Ukraine
